

250,000  
ASSIGNED  
TO PROJECT

The Honorable Ron DeSantis, Governor of the State of Florida

Cc: Will Robinson

CC: Jim Boyd

CC: Kevin Van Ostenbridge

There is a bill going to your desk that will hurt small business in the City of Anna Maria. We have over the last number of years, seen a rapid decline in free public parking. Private lots turned into paid parking and projects like this extension of a multiuse path from a residential area into a commercial area, removing free public parking in front of many small businesses. It not only hurts business, but it is dangerous to bring traffic like this into a busy corner. We have options. Options that keep bikers safe and keep business prospering. If the City would have included us in the study, we could have helped.

The last study we were included in was to change traffic flow from Magnolia to Pine. That was a few years ago, but said nothing of removing parking options for our businesses.

I implore you to use your line veto authority and put a stop to the funding of this project. I am asking for a more thorough study on the impacts to health and safety and to the businesses directly impacted.

Thank you for your consideration.
